### Letter of Reference

Over the past 5 years MLE Electrical were appointed as the electrical sub-contractor on various projects that we have been involved with. MLE are one of our preferred sub-contractors and we hold this company in high regard.

During 2013 we began construction on the Featherbrooke Retirement Village in Krugersdorp where MLE Electrical was appointed as the electrical contractor for the Service Centre and High Density Flats. This project comprised a fully functional service centre, with emergency back-up power, which included an industrial kitchen, frail care centre, doctor's rooms, hair salon, beauty salon, lounges, dining room, library and 222 multi-story flats.

Although this project had multiple challenges, MLE Electrical were able to complete tasks within the time period available to them and consistently performed within the allotted budget provided which often resulted in a saving to the client.

We were extremely comfortable working with MLE for the entirety of the above mentioned project and the pro-active way they approached problems and challenges. MLE consistently perform to exceptional standards producing work of the highest quality. Our confidence in MLE can be attributed to their high quality of skilled and competent personnel and positive approach to all aspects of the project. Together with their flawless management structure it has lead to the successful completion of the project.

Their standard of work is of such a nature that they have since been appointed by the client, Central Developments, for a further two Service Centre project being the Olivedale and Country Life Retirement Villages.

If you require any further information or have any queries regarding this project, please do not hesitate to contact the undersigned.

Sincerely,

**EKSTEEN & LE ROUX**
